Professional Objective

An enthusiastic Information Technology student at King Abdulaziz University, expected to graduate in June 2026, with a strong interest in cybersecurity and hands-on technical work, including network security, vulnerability assessment, and threat detection. Committed to continuous learning, with practical experience gained through COOP training at SANS | Saudi Air Navigation Services, an eJPT certification, and ongoing preparation for CompTIA Security+.

Education

Bachelor's in information technology
King Abdulaziz University – Jeddah
Expected Graduation: June 2026

Experience (University Projects)

- **Graduation Project: Simulation-Based UAV System for Mapping and Emergency Response**
Collaborated on a simulation-based UAV system for aerial mapping and emergency response, covering mission planning, safety monitoring, and post-flight quality reporting. (Technologies: ROS 2, PX4, Gazebo Sim, QGroundControl, OpenDroneMap, PostgreSQL)
- **Halalify: Automated Video Profanity Filter**
Developed an application that detects and censors offensive words in videos using speech recognition technologies (Technologies: Google Cloud Speech-to-Text API, Java, IntelliJ IDEA)
- **E-commerce Website Interface Design (Figma)**
Designed an interactive and user-friendly e-commerce store interface for seamless product browsing. (Technologies: Figma, Prototyping, UX/UI Design)
- **3D Design Project (Blender)**
Created and designed 3D models for interactive scenes and animations using Blender.
- **Database Management with SQL**
Developed a database for a "Central Library Borrowing System," including tables, relationships, and complex queries for book and borrower management. (Technologies: SQL, ERD)
- **Network Simulation using Packet Tracer**
Designed and implemented network simulations using Cisco Packet Tracer to demonstrate network management and security concepts.

Certifications & Workshops

INE Security - eJPT Junior Penetration Tester (Earned Nov 2025)
CompTIA - Security+ (In Progress)
SANS - COOP Training Program Certificate, Directorate of Information Technology (Jul 2025 - Sep 2025)
Black Hat - Cybersecurity Workshop (Attended)

Skills

- **Web & Interface Design:** Figma, UX/UI Principles
- **Cybersecurity Tools:** Kali Linux, Wireshark (basic)
- **Database & Systems:** SQL, ERD Modeling
- **Networking:** Cisco Packet Tracer, Basic Network Configuration
- **Tools & Platforms:** IntelliJ IDEA, Git
- **Soft Skills:** Teamwork, Problem Solving, Critical Thinking, Adaptability, Communication
- **Languages:** Arabic (native), English (beginner)
